PROFESSIONAL SUMMARY

Full Stack Developer with practical experience developing scalable web applications using React.js, TypeScript, Node.js, Express.js, MongoDB, Laravel, and MySQL. Skilled in designing RESTful APIs, implementing secure JWT authentication, role-based access control, database management, and responsive user interfaces. Experienced in building end-to-end full-stack solutions through internships, hackathons, and personal projects. Strong understanding of software engineering principles, MVC architecture, version control, API integration, and modern web development practices.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, PHP **Frontend**

Technologies: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap **Backend**

Technologies: Node.js, Express.js, Laravel

Databases: MongoDB, MySQL, Supabase

Tools & Platforms: Git, GitHub, Postman, VS Code

Core Concepts: REST APIs, JWT Authentication, Role-Based Access Control (RBAC), MVC Architecture, CRUD Operations, State Management, Responsive Web Design, API Integration, Database Design

WORK EXPERIENCE

Full Stack Developer Intern | BPH Technologies LLP

Jan 2026 – Feb 2026

- Developed ShopNest, a full-stack e-commerce platform using React.js, Node.js, Express.js, MongoDB, and Type-Script.
- Designed and implemented RESTful APIs for product, user, cart, wishlist, and order management.
- Implemented JWT-based authentication and role-based authorization mechanisms.
- Developed responsive user and admin dashboards following modern UI/UX principles.
- Integrated MongoDB for efficient data storage and retrieval operations.
- Followed MVC architecture and Git-based version control workflows.

Full Stack Web Development Intern | 1Stop.ai

Mar 2025 – Apr 2025

- Developed web applications using Laravel and PHP.
- Built backend modules following MVC architecture principles.
- Created CRUD functionalities and RESTful APIs.
- Integrated frontend views with backend services.
- Worked with MySQL database management and optimization.

Full Stack Development Intern | Cognifyz

Aug 2025 – Sep 2025

- Developed full-stack applications using React.js, Node.js, Express.js, and MongoDB.
- Implemented RESTful APIs for user authentication and data management.
- Built JWT-based authentication systems and protected routes.
- Optimized database queries and backend performance.
- Followed clean coding practices and Git collaboration workflows.

PROJECTS

ShopNest – Full Stack E-Commerce Platform

React.js, TypeScript, Node.js, Express.js, MongoDB, Redux Toolkit, JWT, Tailwind CSS

- Designed and developed a full-stack e-commerce platform with scalable frontend and backend architecture.
- Implemented secure JWT-based authentication and role-based access control.
- Developed product catalog, inventory management, shopping cart, wishlist, and order lifecycle functionalities.
- Created RESTful APIs for users, products, orders, and administrative operations.
- Built responsive user and admin dashboards with Redux Toolkit state management.
- Integrated MongoDB for persistent data storage and optimized database interactions.
- Performed API testing and debugging using Postman.
- Managed source code using Git and GitHub version control.

SERL – Emergency Response System

Laravel, PHP, JavaScript, Leaflet.js, MySQL, Tailwind CSS

- Developed a real-time emergency response platform during a hackathon.
- Built SOS alert triggers for Fire, Medical, Police, and emergency contacts.
- Implemented live location tracking using Leaflet.js and Google Geolocation APIs.
- Developed secure user authentication and emergency contact management modules.
- Designed responsive dashboards for monitoring emergency incidents.
- Collaborated within a team environment under strict project deadlines.

MoodFit – Fitness & Wellness Platform

React.js, TypeScript, Tailwind CSS, Supabase, Pre-trained ML APIs

- Built a responsive single-page wellness platform using React.js and TypeScript.
- Developed Emotion Analysis, Posture Monitoring, and Fitness Activity Tracking modules.
- Integrated pre-trained machine learning APIs for real-time analysis.
- Implemented client-side routing and component-based architecture.
- Utilized Supabase for authentication and backend services.
- Optimized performance across desktop and mobile devices.

EDUCATION

Dayananda Sagar Academy of Technology and Management

Bachelor of Engineering in Computer Science and Engineering

2023 – 2027

CGPA: 8.82 / 10.00

Gurukul PU College

Class XII (PCM)

2021 – 2023

Percentage: 89.83%

Shree Sangam Vidya Mandir

Class X

2020 – 2021

Percentage: 98.72%
